

Capabilities Statement

Company

FabMetals, Inc. has assembled a team of engineers and manufacturing specialists to produce quality products and deliver outstanding customer service. Combining the talent and technology with our machine capabilities, FabMetals, Inc. can evaluate, engineer, design, and manufacture prototypes to large contractual production.

Our 54,000 sq. ft. administration and fabrication center houses our corporate offices which include a climate-conditioned production area and two 10-ton overhead cranes for ease of moving large fabrications.

Our team of professionals, working with leading-edge engineering practices and technologies, are dedicated to providing quality manufacturing while meeting your most demanding deadlines.
